Experience A New Level Of Comfort Throughout Your Home

Arzel® Zoning Technology, Inc.

Defining Comfort For A New Age

Are You As Comfortable As You Could Be In Your Own Home?

We heat or cool our homes to keep our family comfortable. But, a single thermostat in the living room can't always keep the upstairs cool or the basement warm. Fact is, you may feel a 12 to 15 degree difference in comfort levels within your own home.

Heat from the sun can make one side of your home significantly hotter than the other side. What's more, homes with large rooms or rooms with high ceilings can be very difficult to heat or cool. One thermostat in the typical home just can't maintain suitable comfort levels throughout the entire home.

But now there is a surprisingly simple way to make sure that every area of your home is comfortable – not just the room with the thermostat.

One Home. Many Comfort Zones.

Arzel® has an inspired and affordable solution...create multiple comfort zones throughout your home.

His Zone

Her Zone

Their Zone

Our Zone

"My house is finally a pleasure to come home to. We are not afraid to have guests over anymore and take their coats. "

C. Kaplow - Denver, Colorado

Amazing New Technology Transforms Your Home Into Custom Comfort Zones!

Now you can lose the extra blankets, space heaters or fans and cut your energy bills at the same time! With the Arzel® Zoning System, you divide your home into separate comfort zones that make sense for your lifestyle.

Each zone gets its own thermostat you set to whatever temperature you want for that zone. Our unique and patented damper system in your ductwork controls the flow of conditioned air and makes each zone a custom comfort zone.

Best of all, the installation process won't disrupt your household. You see ordinary zoning systems often have to drill holes in your ceiling and walls to take your ductwork apart. That can get very costly and very messy. But the convenient Arzel® Zoning System uses your existing ductwork…just the way it is.

The Arzel® Zoning System lets you control the climate of your home to get the temperature to be...

What you want it to be
Where you want it to be

When you want it.

You Create Your Own Comfort Zones.

A zone can be just one room or several rooms. The choice is yours. You could make your kitchen its own zone or group it with your dining room and living room. You could give each of your bedrooms their own zone or group them together. It's your choice…and that's the beauty of zoning. You create just the right comfort pattern to keep your family comfortable throughout your home.

How many thermostats would you like in your home?

"Without hesitation I would highly recommend an Arzel® Zoning System to any homeowner that has problems regulating the heating and cooling throughout the house."

Jeff and Gail Nichols - Greenville, South Carolina

Simple Installation. Simple Operation.

The elegance of the Arzel® System is its simplicity. Our EzySlide™ dampers slide right into your existing ductwork. You don't have to replace your ductwork as you would with ordinary zoning systems.

There are no wires, no motors, no special sensors. It works with any conventional thermostat. And, the Arzel® Zoning System Zone Control Panel comes already preprogrammed for quick installation. What could be easier?

Shhh...Quiet Damper Action

No noisy motors as with ordinary zoning systems, just the soft whisper of our patented air-driven dampers.

But best of all, the unique gaskets on our dampers are designed to provide complete shut-off. That means there is no expensive over-conditioning. And, Arzel® is the only system that gives you this money-saving benefit.

5 Year Warranty

Maybe the best thing about the Arzel® Zoning System doesn't have anything to do with temperature at all. It's the peace of mind you get knowing that the parts and labor in your new system are covered by a full 5-Year Warranty!

Arzel® Zoning Technology, Inc.

Defining Comfort For A New Age

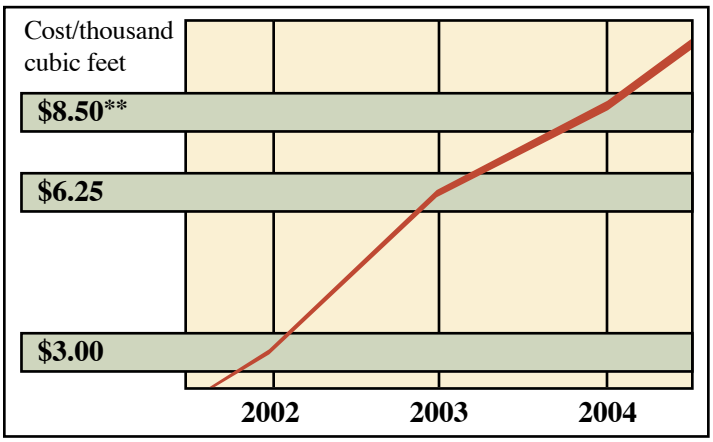
"I highly recommend the Arzel® System as one of the best residential zoning systems available in the marketplace today."

Michael Eisenbise, P.E., C.S.P. - Simpsonville, South Carolina

Your Arzel® System Can Pay For Itself In Energy Savings!

Natural Gas prices are predicted to skyrocket in coming years. In fact, Federal Reserve chairman Alan Greenspan warned of an alarming 150% price increase!* But now this amazing technological breakthrough in comfort control lets you live comfortably all year round and cut your energy costs at the same time!

Soaring National Gas Prices



That's right. With the amazing Arzel® Zoning System, you can realize substantial energy savings. And now, with soaring gas costs, your energy savings can actually pay for your system!

*"Natural gas at a wholesale has surged to $6.25 per thousand cubic feet compared with an average of about $3 last year. Greenspan said market expectations "imply a 25 percent probability" that the peak price natural gas on the wholesale market could exceed $7.50 per thousand cubic feet by January (2004)"

** Estimated

But the real advantage of the Arzel® Zoning System isn't the cost savings...it's the control it gives you to create your own custom comfort zones...right within your home. Now you don't have to live in a hot house in the summer or a cold house in the winter. Our technology makes it possible to create a comfortable home...in every season.

Best of all you don't need to add a new furnace or air conditioning unit. And, you don't need to tear apart your ductwork. Arzel® is the smart, simple and affordable way to keep comfortable throughout your entire home. And you can bank on that.

Defining Comfort For A New Age

"...our utility bills are much less than they would have been without your system."

Steve Young - Pepperpike, Ohio

You're Already Using Comfort Zoning... And Don't Even Know It!

Chances are, your car already has dual temperature controls. One for the driver and one for the passenger. That's comfort zoning!

We've come to expect individual climate controls within our automobile. If you like it hot and your passenger likes it cool, just press a button and you're each in your own comfort zone. This is the type of comfort you've grown used to on the road. Shouldn't you expect the same level of comfort inside your home?

You'll Feel The Difference...Immediately!

There's a good chance your contractor can install the Arzel® System in your home within one day. Then just set your new thermostats and feel the comfort…instantly! You'll be amazed at how each area of your home has become its own custom comfort zone!

Enjoy A New Level of Comfort

Transform your house into an Arzel® custom comfort zoned home. It's the smart, simple and affordable way to experience a new level of comfort throughout your home. Call your heating and air conditioning contractor today and start living in the comfort zone!
